CLAIM AMENDMENTS

Please replace the pending claims with the following listing of claims:

- 1-49. (Canceled).
- 50. (Currently Amended) A nitride semiconductor structure comprising on a substrate:
 - an n-type collector layer;
 - a p-type base layer which is at least one of layers formed on said n-type collector layer; and
 - an n-type emitter layer formed on said p-type base layer, wherein
 - a surface of said p-type base layer, which is exposed by etching said n-type emitter layer, is provided with an indium-containing p-type nitride semiconductor layer, which is regrown on said surface.
- (Original) The nitride semiconductor structure according to claim 50, wherein said p-type nitride semiconductor layer is p-type InGaN.
- (Original) The nitride semiconductor structure according to claim 51, wherein said p-type base layer is p-type InGaN.
- (Original) The nitride semiconductor structure according to claim 51, wherein said p-type InGaN base layer has an indium mole fraction of 5 - 30%.
- 54. (Original) The nitride semiconductor structure according to claim 51, wherein said p-type nitride semiconductor layer has an indium mole fraction higher than an indium mole fraction of said p-type InGaN base layer.
- (Original) The nitride semiconductor structure according to claim 50, wherein said p-type base layer is p-type InGaN.

- (Original) The nitride semiconductor structure according to claim 55, wherein said p-type InGaN base layer has an indium mole fraction of 5 - 30%.
- 57. (Original) The nitride semiconductor structure according to claim 55, wherein said p-type nitride semiconductor layer has an indium mole fraction higher than an indium mole fraction of said p-type InGaN base layer.
- 58. (Original) The nitride semiconductor structure according to claim 50, wherein said p-type InGaN base layer has an indium mole fraction of 5 30%.
- 59. (Original) The nitride semiconductor structure according to claim 58, wherein said p-type nitride semiconductor layer has an indium mole fraction of said p-type InGaN base layer.
- 60. (Original) The nitride semiconductor structure according to claim 50, wherein said p-type nitride semiconductor layer has an indium mole fraction higher than an indium mole fraction of said p-type InGaN base layer.

61.-76. (Cancelled)

- 77. (New) The nitride semiconductor structure according to claim 50, further comprising a graded layer between said p-type base layer and said n-type collector layer, said graded layer has its indium mole fraction varied gradually.
- 78. (New) The nitride semiconductor structure according to claim 51, further comprising a graded layer between said p-type base layer and said n-type collector layer, said graded layer has its indium mole fraction varied gradually.
- 79. (New) The nitride semiconductor structure according to claim 55, further comprising a graded layer between said p-type base layer and said n-type collector layer, said graded layer has its indium mole fraction varied gradually.
